Border Oak Garden Structures

Border Oak can make a wide range of wonderful oak framed garden structures

Everything from gazebos, potting sheds, pergolas and outdoor kitchens to rose arches, poolside shelters and landscaping features

Everything we design and make is crafted by hand in our carpentry workshops in Herefordshire. We use only the finest and most sustainable Restoration Grade green oak, traditional jointing techniques and exceptional natural materials to ensure every structure we create is made to last a lifetime, weathering softly into its setting.

We have a range of buildings that can be supplied as a 'kit' for self assembly but can also make other items upon request.

Our Oak Frames

Our hand crafted oak frames are text assembled in our workshops to ensure quality. The rafters are pre-cut with individual 'birds mouth' details to sit perfectly on wallplates, we also supply a unique self assembly pack containing nails, fixings, gloves, goggles, hard hats, ratchet straps, teak oil and a special drill bit.

We also offer a bespoke service for other oak framed buildings such as outdoor kitchens, rose arches, pergola's and more. Bespoke buildings can be discussed with our in-house team.
